Solutions

Recycling

not circular
but spiral economy

- new raw synthetic material needs to be added to recycled material
- after two cycles of recycling, most of the materials need to be burned anyway

Bioplastic 1. generation

100% biobased

100% biodegradable

INDUSTRIAL
COMPOST

Bioplastic 2. generation

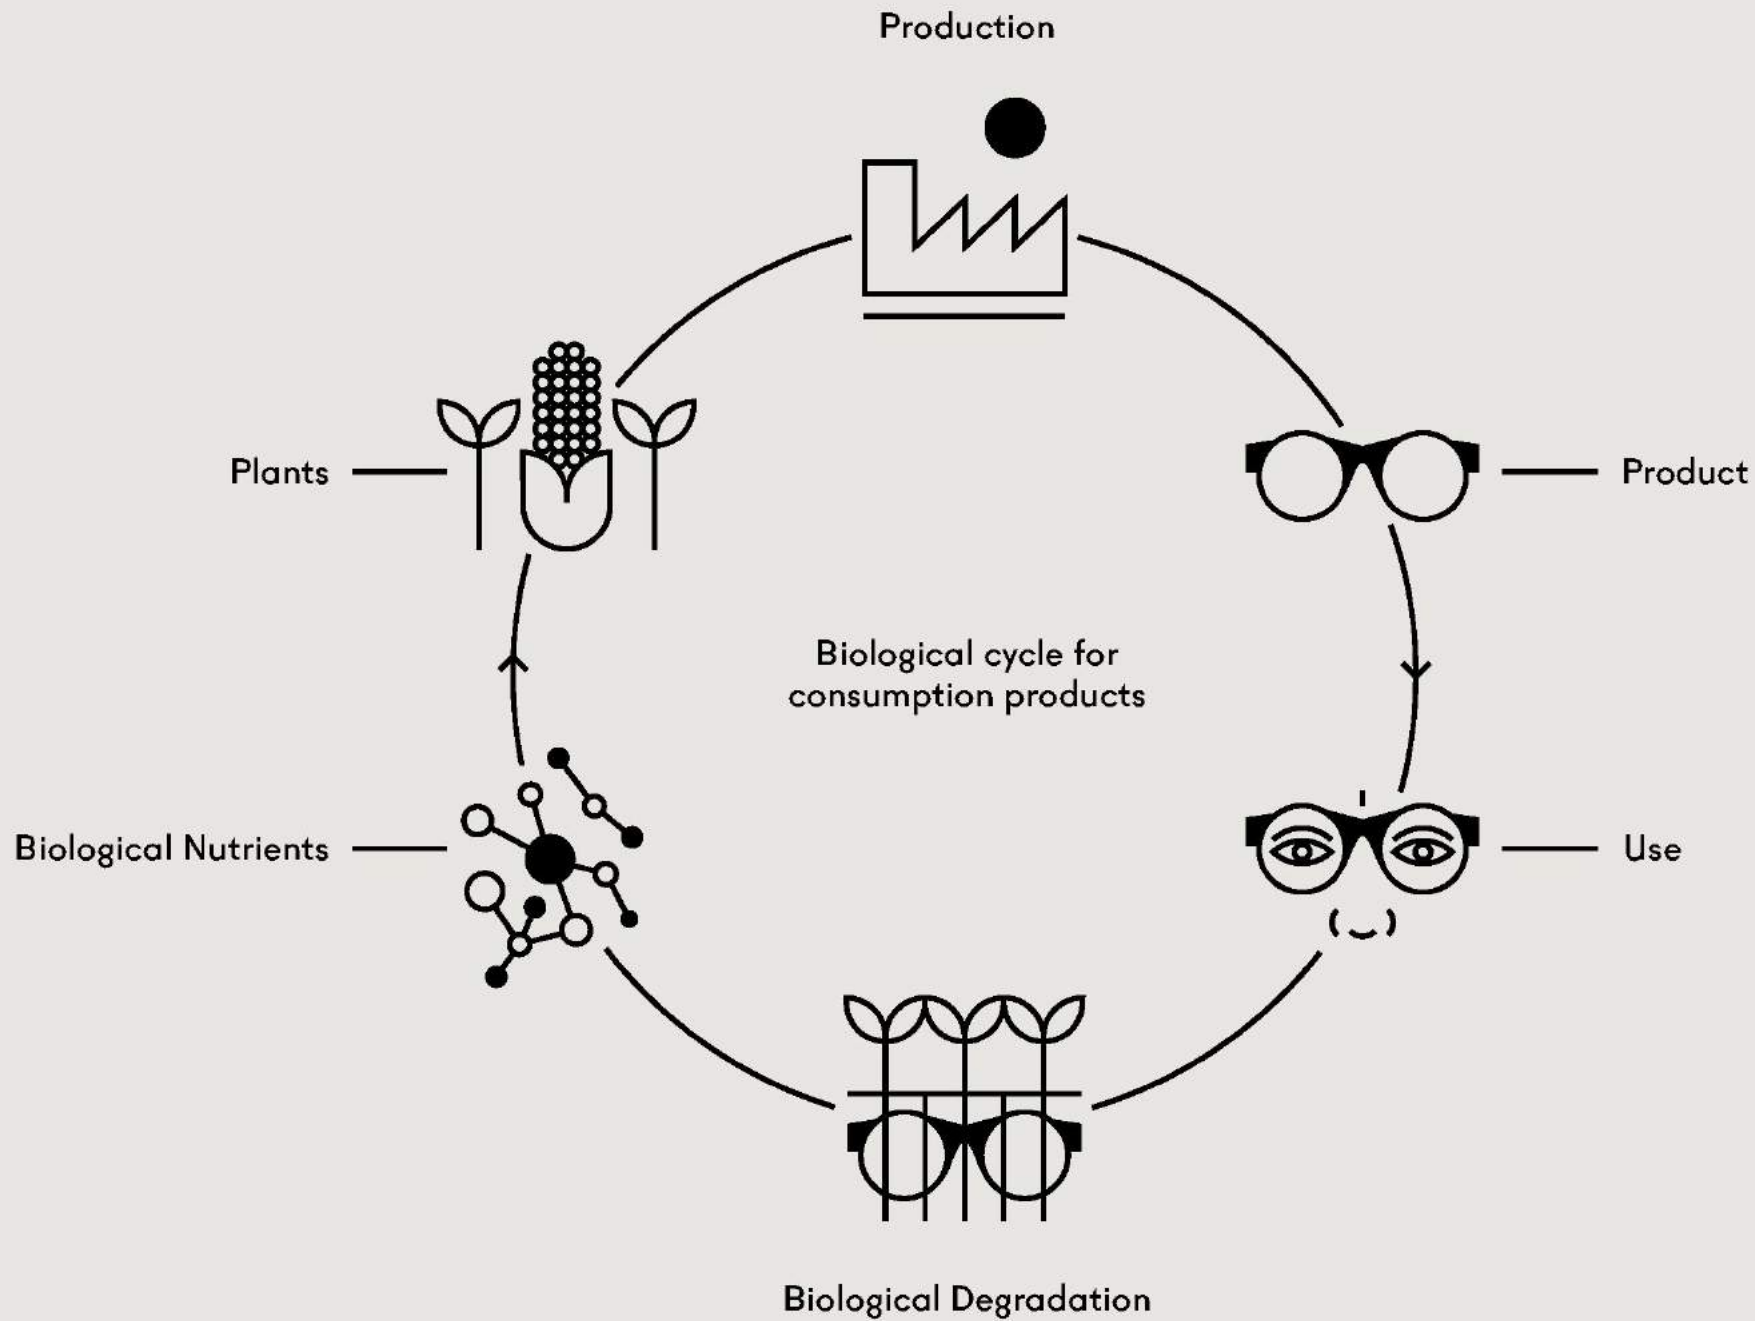

100% biobased

100% home-compostable

HOME
COMPOST

final solution closed loop system

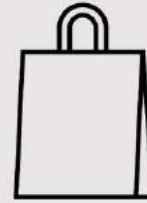

What is plastics used for?

Infrastructural
products

Disposable
products

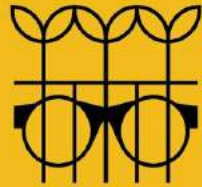

Durable
consumer
products

New generation of bioplastics

100% biodegradable

patented
and manufactured
in Slovakia

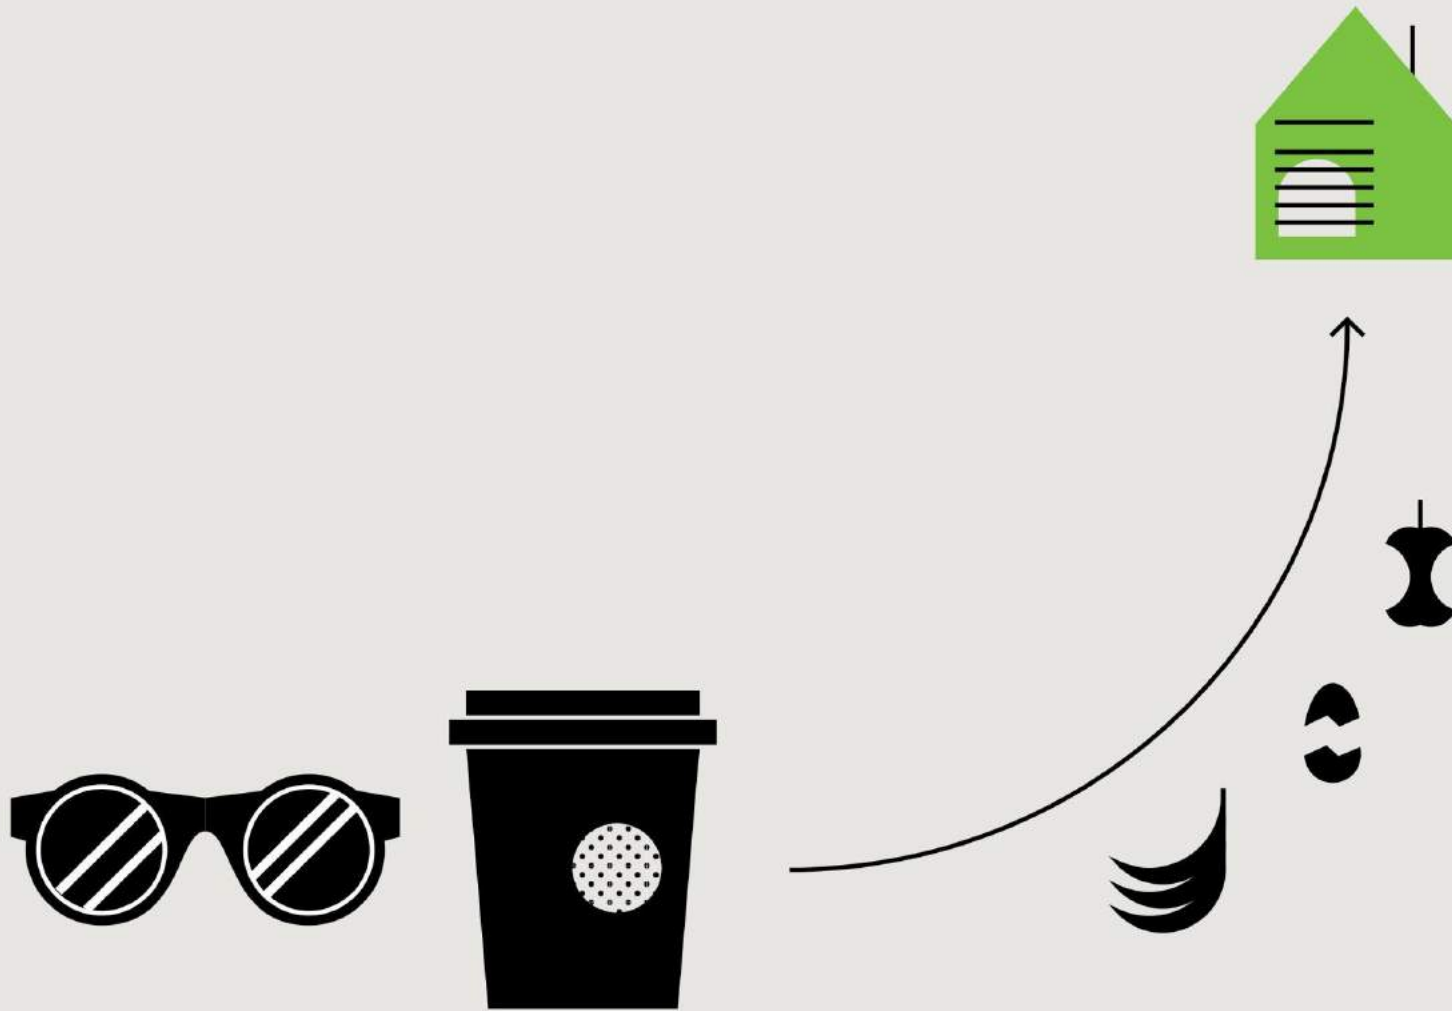

100% based
on raw renewable
resources

stable
and durable
